Frameworks & Library: React, Redux, NextJS, FastAPI, Flutter

Other: Docker, Postman, CI / CD, GCP, Git, REST APIs, HTML, CSS, Tailwind CSS

Experience

AnyDay

October 2023 - Present

Fullstack Developer | *React, NextJS, Python, Flutter*

Vancouver, BC

- Spearheaded the development and architecture of a new member portal using **NextJS**, **Zustand** and **TanStack Query**, managing full project lifecycles from creation through deployment
- Implemented scheduled payouts functionality, enabling clients to fund accounts via EFT transfers and allowing customers to cash out their accumulated balances early
- Designed and built an automated email communication tool for the marketing team, streamlining data filtering, export processes, and email flows, saving **5-7 developer hours** per week
- Coordinated with product and design teams to align project scope, showcased progress through sprint demos and contributed to monthly engineering reports

SEO Soul

January 2023 - July 2023

Web Developer | *React, TypeScript, Node.js*

Vancouver, BC

- Migrated **20+ classes** from a monolith application into a microservice, providing more scalability and easier maintenance of an e-commerce platform
- Engineered the web audit **Chrome Extension** for the company's internal product, leading to an improvement in team workflow efficiency and an increase in data accuracy during audit assessments
- Redesigned e-commerce platform UI / UX with **React** and **TailwindCSS** which contributed to a **12%** growth in monthly active users; resulting in additional revenue

Tiggy Delivery Corp

September 2021 - August 2022

Junior Software Developer | *JavaScript, React, PostgreSQL*

Vancouver, BC

- Integrated **WebSocket** technology for a real-time driver tracking and developed notification system with **React**, leading to a significant improvement in delivery ETA accuracy and customer satisfaction
- Reduced the loading time of the admin panel from **15 seconds** to **3-5 seconds** using **PostgreSQL** projection and pagination to allow a smoother user experience
- Worked in an **agile** environment, participated in the sprint reviews and demoed new features to the team
- Wrote unit and integration tests for a notification system with over **90%** coverage using **Jest** and **Cypress**

Projects

Unifyi | demo

A platform tackling university-related questions for students | *JavaScript, React, Redux, Docker*

- Assumed full stack developer role and created backend and frontend features in **10+ microservices**
- Built **20+** webpages and optimised all components for mobile performance using React and contributed reusable components that accelerated feature implementation across the application
- Acted as a product owner for a team of **4 members** in an **agile** environment
- Developed chat and notification features using **Socket.io** for event-driven architecture

Education

Simon Fraser University

Bachelor of Science, Computer Science

2017 - 2021

Vancouver, BC
